

The I2C Barometric Pressure is a Digital Barometer based on Freescale MPL115A2 sensor. With 50 to 115 kPa absolute pressure, +/- 1 kPa accuracy compensated with host microcontroller. An ADC converts the temperature and pressure sensor readings via I2C port. Useful as a weather station atmospheric pressure monitor, altimeter, and other applications that may require measurements of ambient pressure.

FEATURES:

- Powered by MPL115A2 free scale sensor
- 50 kPa to 115 kPa absolute pressure
- +/- 1 kPa accuracy with host controller compensation.
- Integrated ADC
- Monotonic pressure and temperature data outputs
- Compatible in gizDuino/Arduino shield.

GENERAL SPECIFICATION:

Power Supply : 2.375 V - 5.5 VDC

I/O Interface : I2C
(Operates up to 400 kHz)

Conversion Resolution:
• 7-bit I2C address = 0x60

PCB Dimension:
• 25.5W x 25.5L mm

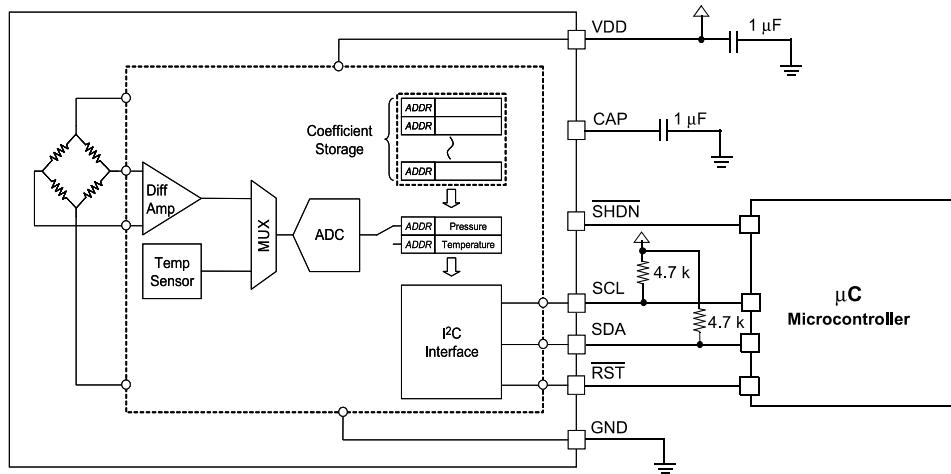

Figure 1. Block Diagram MPL115A2 (used 4.7k pullup resistor for I2C Communication.)

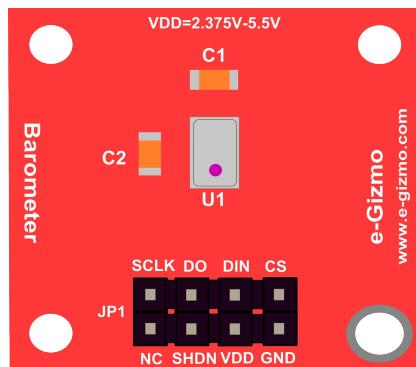

Figure 2. MPL115A2 I2C Barometric Pressure

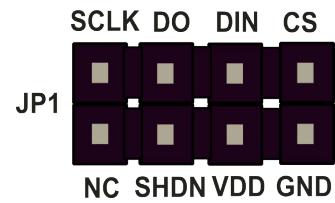

Figure 3. JP1 Connections

Table 1. JP1 PIN Descriptions

Pin Name	Description
VDD	Power supply connection : VDD = 2.375 V to 5.5 VDC
GND	Ground
SHDN	Shutdown: Connect to GND to disable the device. When shutdown all part draws 1uA current and all communications pins are high impedance. Connect to VDD for normal operation.
CS	Reset: Connect to GND to disable I2C communications.
NC	No Connection
DIN	Serial data I/O line
SCLK	I2C Serial Clock Input
DO	No Connection

MPL115A2 I2C DIGITAL BAROMETER

- This is a sample code for MPL115A2 Barometer utilizing MPL115A2.h library.
- The output of this IC are Pressure (in kPa) and Temperature (in Celcius).

MPL115A2 functions:

readBoth(&P, &T) - Simultaneously read pressure (P) and temperature (T) from the chip.
 readPressure() - returns the pressure reading from the chip.
 readTemperature() - returns the temperature reading from the chip.
 *Both returned values are floating points.

Wiring Connection:

MPL115A2 BREAKOUT BOARD GIZDUINO

VCC	<----->	VCC
GND	<----->	GND
CS/RESET	<----->	A2
SHDN	<----->	A3
DIN/SDA	<---->	A4 <-- 4.7kohms --> VCC
SCLK/SCL	<---->	A5 <-- 4.7k ohms--> VCC
